Subject: comment

I understand that the DOJ is accepting comments from "joe public" on the Microsoft case.

I found it a bit disturbing, yet not surprising, when the years of court battles and so obvious contempt for the people and laws of the land by Microsoft, that the proposed settlement is nothing more than a slap on the wrist for the offender. I, my family, my friends, and my business contacts would like to observe "justice" served on Microsoft. While there is always some need to take pot shots at, and make fun of, a winner.. it is obvious that Microsoft did wrong and tried to hide that fact.

Justice should hurt... and hurt more than ones wallet.

Righting a wrong, and punishing previous behavior, should be a burden on Microsoft... not a line item in a spread sheet.

Regards,

James Botaitis Esq.
